REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record fails to adequately anticipate or obviate either singularly or in combination with another reference the claimed device and method of making the device, which include a *resistive element with a top surface electrode on which is formed a field effect transistor element*, and a sensing element, wherein the gate of the transistor is electrically connected to the top surface of the resistive element, one of the electrodes of the sensor element is electrically connected with the top surface of the resistive element, a source electrode and drain electrode are connected with second and third electrodes formed on the surface of the substrate, and the other electrode of the sensing element is electrically connected with the first electrode on the substrate. (Italics added for the additional subject matter added in the amendment filed 12/20/01 which overcome the previous reference and place the claims in condition for allowance).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
